

A Linear Regression — Θ (dihedral angle)

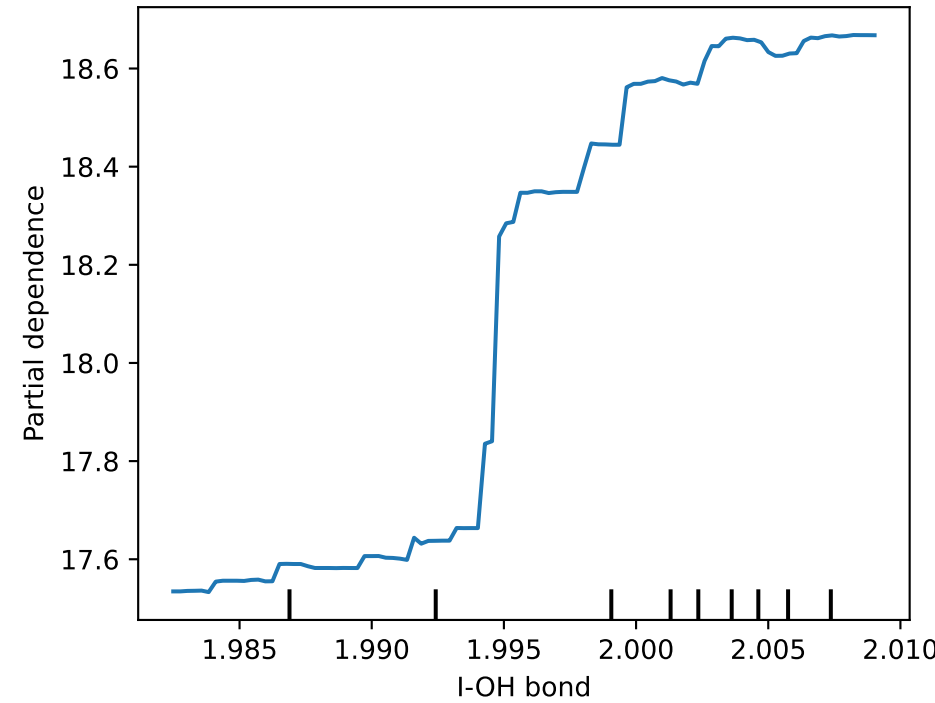

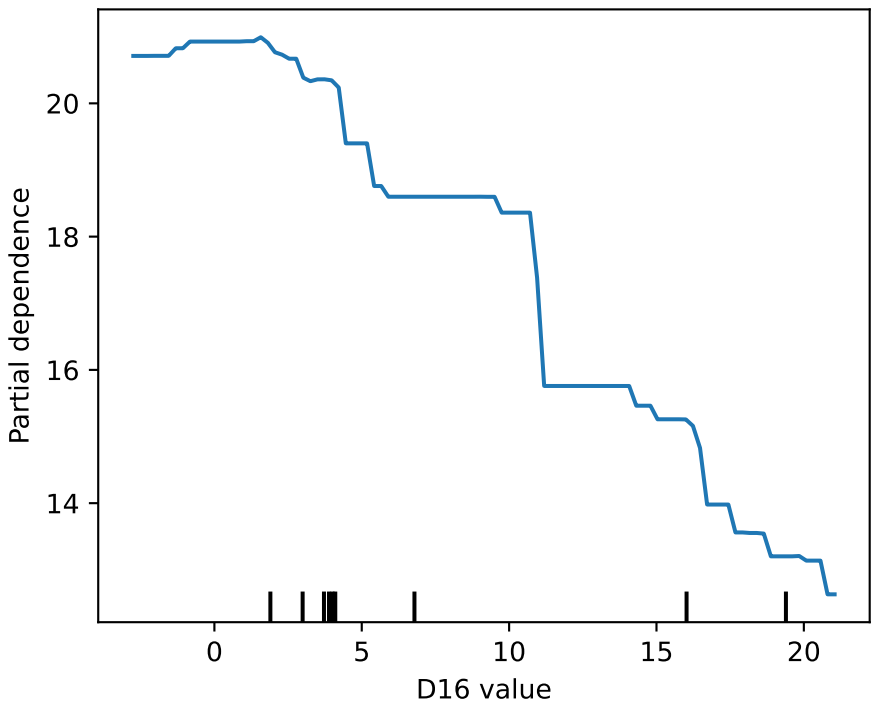

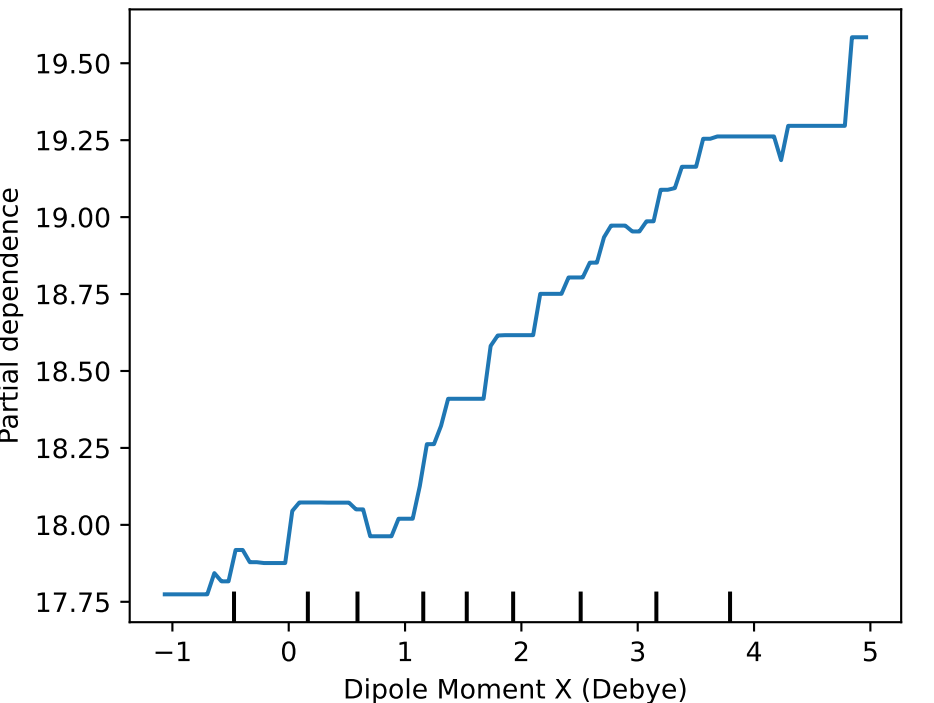

B Linear Regression — I-OH bond length

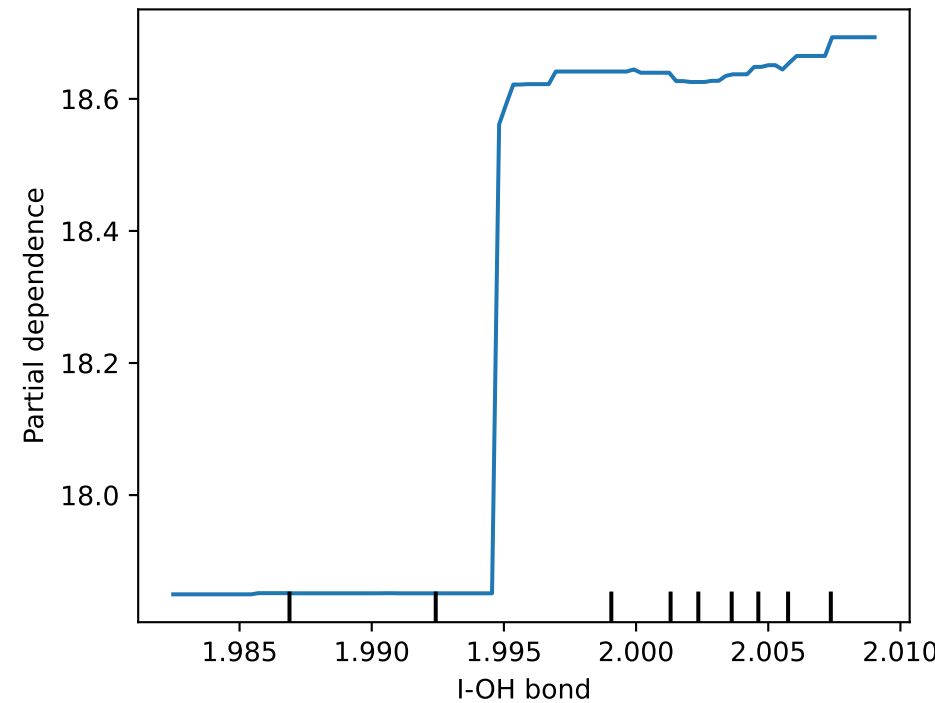

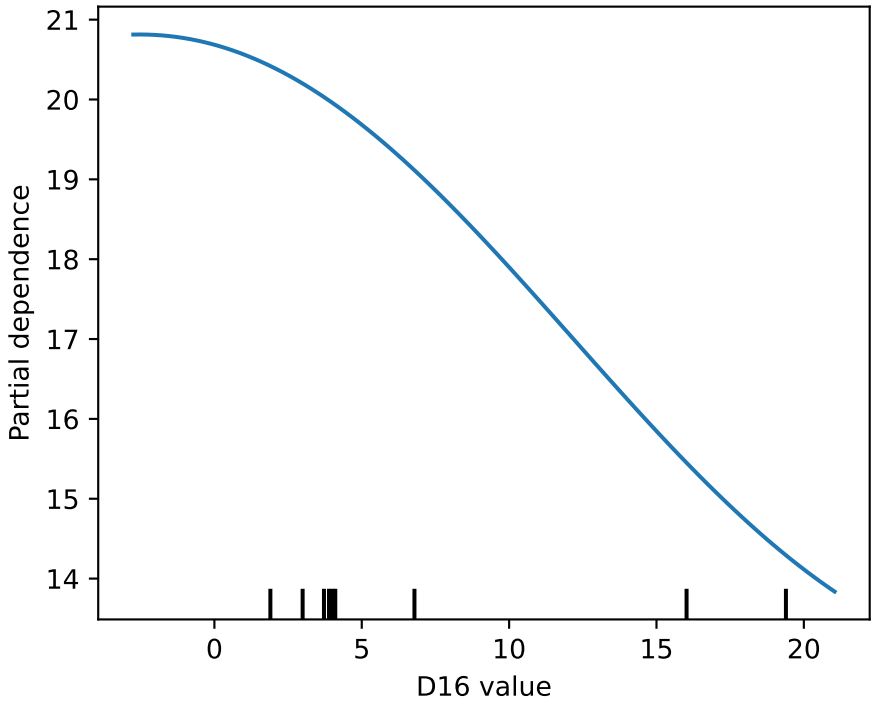

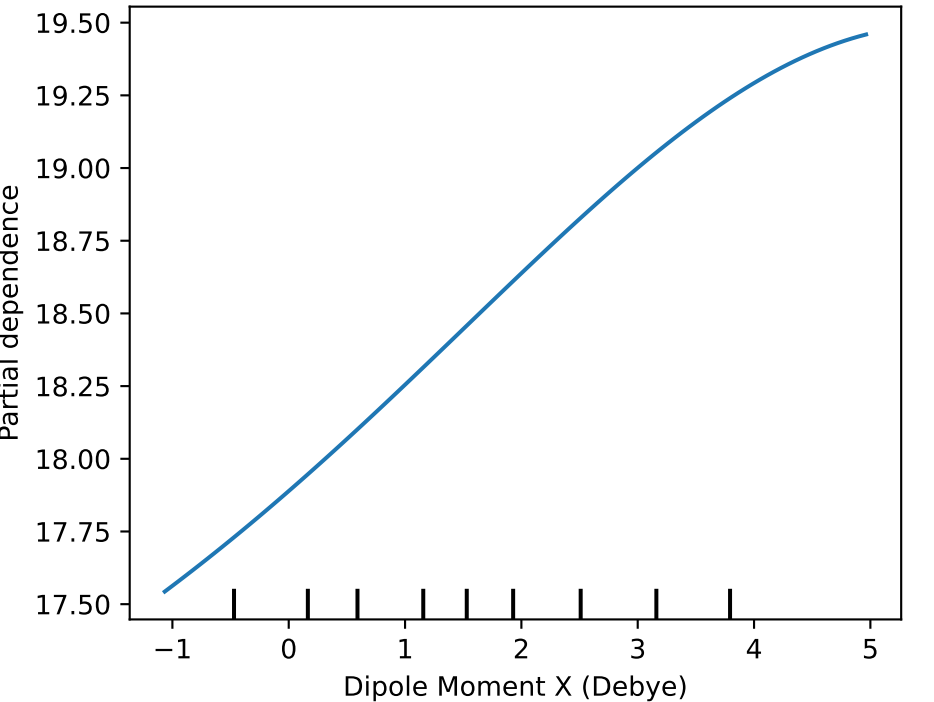

C Linear Regression — I=O bond length

D Random Forest — Θ (dihedral angle)E Random Forest — μ_X (dipole moment, X)

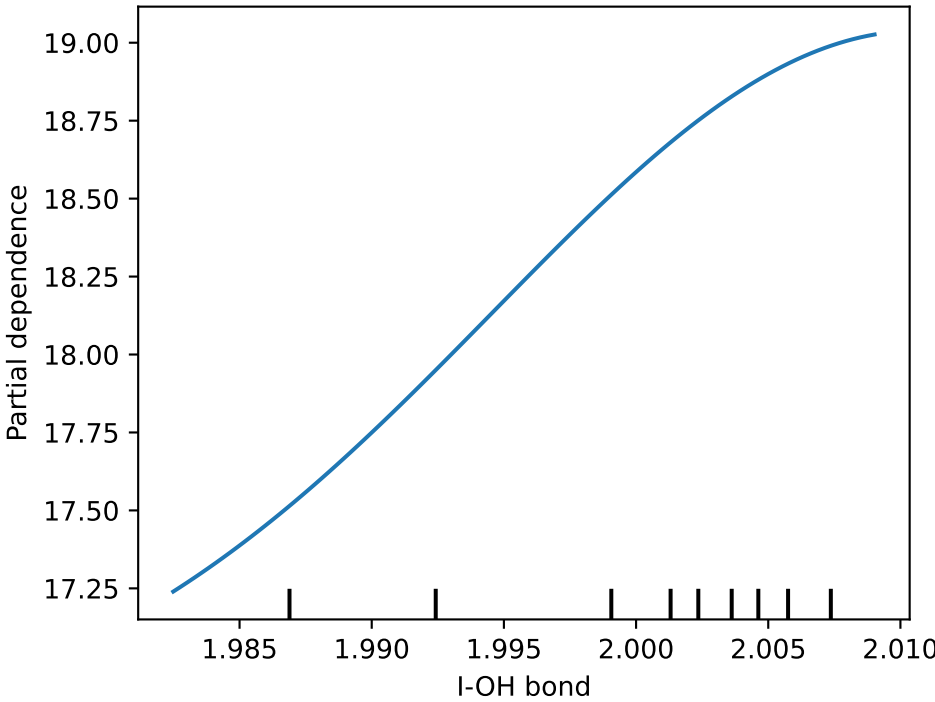

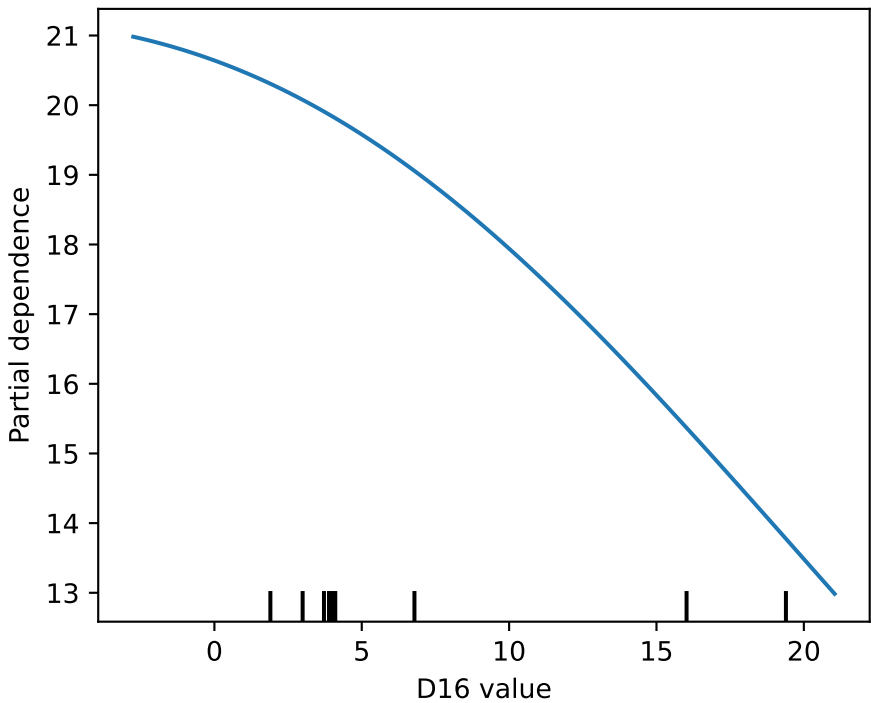

F Random Forest — I-OH bond length

G Gradient Boosting — Θ (dihedral angle)H Gradient Boosting — μ_X (dipole moment, X)

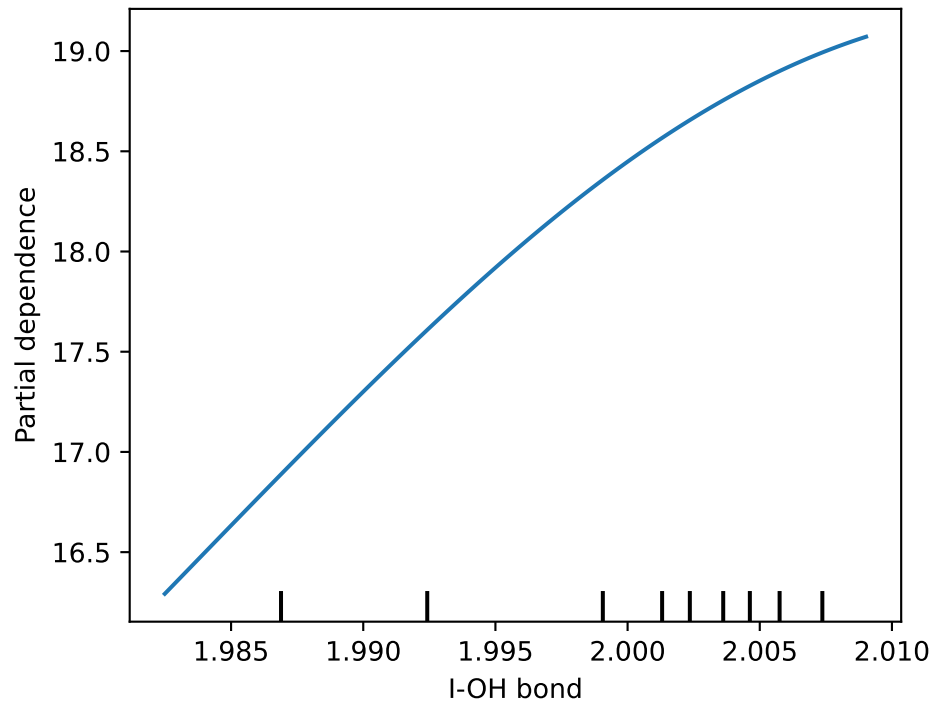

I Gradient Boosting — I-OH bond length

J Support Vector Regression — Θ (dihedral angle)K Support Vector Regression — μ_X (dipole moment, X)

L Support Vector Regression — I-OH bond length

M Neural Network — Θ (dihedral angle)

N Neural Network — I-OH bond length

O Neural Network — μ_X (dipole moment, X)
